Browsers' compatibility with the service

browser	Linux	Windows 7	OS X
Google Chrome	23.0.1271.97	23.0.1271.64 m	27.0.1453.116
Chromium	25.0.1364.160	Not tested	Not tested

}}}

		Windows 7	OS X
Safari		Not tested	Not compatible
Mozilla Firefox		21.0	21.0
Opera		Not compatible	Not compatible
Konqueror		Not compatible	Not tested
Internet Explorer		Not tested	Not compatible
Links		Not compatible	Not tested

Key

The browser has not been tested under given operating system.	The tested version of browser is fully compatible with the service.	The tested version of browser is not fully compatible with the service.

Chrome

If you are Linux user, then (according to
 http://www.borfast.com/blog/how-enable-webgl-google-chrome-linux-blacklisted)
you can try running it from commandline with *--enable-webgl* and *--ignore-gpu-bl*
switches:

```
$ google-chrome --enable-webgl --ignore-gpu-blacklist
```

It should be working for other operating systems too. Moreover, you can set appro
with chrome://flags/ URL in your Chrome browser.
