3d Brain Atlas Reconstructor on-line service

getCafInfo

Returns the index file of selected CAF dataset. Index file contains list of structures available for reconstruction, their hierarchy and list of slides within given dataset.

syntax
```
getCafInfo?cafDatasetName=<name>
          [;listStructures=(True|False)]
          [;listHierarchy=(True|False)]
          [;listSlides=(True|False)]
```

Required arguments

- cafDatasetName

  The service identifier of the selected CAF dataset. Here? you can find a list of all available CAF datasets.

Optional arguments

All optional arguments may be set to True or False with True as default.

- listStructures

  Indicates if information about structures has to be included in the CAF index file.

- listHierarchy

  Indicates if information about structures hierarchy has to be included in the CAF index file.

- listSlides

  Indicates if information about slides has to be included.
