Available export formats

Currently 3D Brain Atlass Reconstructor software allows to export reconstructions in the following formats:

Volumetric formats

- VTK (Visualisation Toolkit) structured grid,
- NumPy array,
- NIfTI (Neuroimaging Informatics Technology Initiative),

Mesh formats

- VRML (Virtual Reality Modeling Language),
- X3D (Extensible 3D),
- POV-Ray (Persistence of Vision Raytracer),
- VTK (Visualisation Toolkit) polydata.
